## PROJECTS

**Charter Cruise Social Media Platform** - <https://github.com/jocosocial/swiftarr>

- Contribute to a bespoke social media platform built for the unique culture of a nerd cruise.
- Develop core application features, deployment & testing orchestration.

**Charter Cruise Android App** - <https://github.com/jocosocial/tricordarr>

- Built a React Native app for Android devices using the Twitarr service API (see above).
- Successfully implemented push notifications in a zero-internet environment.

**Internet Connection Monitor** - <https://github.com/CFCC/TurboStacks/tree/main/metrics>

- Developed a series of dashboards to display connection metrics and determine perceived network quality.
- Utilized Docker Compose, Grafana, Prometheus, and the Blackbox Exporter.

**Cocktail Recipe Research Platform** - <https://github.com/cohoe/amari>

- Built a full-stack application platform to manage and query recipes in a variety of domain-specific ways.
- Stack consists of React, Flask (RESTx), Zookeeper, Redis, ElasticSearch, PostgreSQL, Cognito.

**Puppet Infrastructure for Computer Camp** - <https://github.com/CFCC/TurboPuppet>

- Implemented Puppet to fully provision camper computers for a two-week summer program.
- Built using many industry best practices learned at Constant Contact and through the community.

**Bluetooth Headphone Connection Manager** - <https://github.com/cohoe/maxime>

- Tool in Python on Fedora Linux to manage PulseAudio sinks & deal with Bluetooth connectivity quirks.
- Listens for Dbus events and routes audio stream based on user configuration and connection state.

**Open Source Network Resource & Access Manager** - <https://legacy-blog.grantcohoe.com/projects/starrs>

- Designed and developed an interactive system for auditing and management of network resources.
- Gives users a self-service portal to provision logical resources such as IP addresses and DNS records.
